THE IDEA

A User must log in to use this app. A logged in User will be directed to the home page where they enter their current location, style category, mens/womens fashion category and uploads their look. The user is then directed to their post page where they add/update the details of their own look. If a user is logged in they can browse a page containing the looks that other users have posted. If the user selects another look they can then favorite this look to view later.

USER STORIES

- 1. USER ACCESS:
As a User, when I create an account, I would like to be able to contribute 'look' posts to the application.
- 2. USER POST CREATION:
As a logged in User, I would like to upload a photo of my look and the details of it so that I can share information about my style.
- 3. USER BROWSE RESULTS:
As a logged in User, I would like to be able to browse the looks of other users by seeing a page of all the looks.
- 4. USER VIEWS ANOTHER USER'S LOOK:
As a logged in User, when I select another user's look, I would like to be able to 'favorite' this look to reference at a later time.
- 5. USER COMMENTS:
As a logged in User, when I select another user's look, I would like to see a rating scale (from 1 to 5) and brief comment box to rate the look.
